-

1. Getting Started

1.1 Logging In

1. Open the application URL in your browser.
2. Enter your **Email** and **Password** on the login screen.
3. Click **Login**.
4. On success, you will be redirected to the Admin Dashboard.

If you cannot log in, contact your system administrator to verify your account is active and your credentials are correct.

1.2 First-Time Setup

After your first login, your administrator should have already:

- Assigned you to one or more **Business Verticals** (e.g., Dairy, Transport, Maintenance).
- Given you a **Role** that determines what you can see and do.
- Optionally assigned you to specific **Sites**.

If any of these are missing, contact your admin.

2. Dashboard Overview

The Admin Dashboard (/admin/dashboard) is your central hub. It provides at-a-glance metrics and analytics organized into tabs:

Tab	What It Shows
Fuel Management	Diesel consumption, efficiency analytics, fuel logs
Inventory	Stock levels, material usage, inventory status
Contractors	Contractor performance, productivity metrics
Dairy Sites	Site-level reporting and operational metrics

How to use:

- Click on any tab to switch between operational areas.
- Review KPI cards at the top for key metrics.
- Scroll down for charts and detailed breakdowns.

3. Navigation & Sidebar

The left sidebar is your primary navigation tool. It is organized by department and function:

HR

Employees | Recruitment | Payroll | Performance | Training | Policies

Finance

Accounts | Invoices | Expenses | Budgets | Reports | Taxes

Operations

Projects | Inventory | Suppliers | Quality Control | Maintenance

Sales

Leads | Customers | Orders | Pipeline | Analytics

Admin

Modules | Business Verticals | Sites | Roles & Permissions
Attributes | ABAC Policies | Users | Forms | Workflows
Projects | Documents | Reports | Dashboards | Notifications

Tips:

- Click a section header (e.g., “Admin”) to expand or collapse it.
 - Use the **Business Selector** at the top to switch between business verticals.
 - Your sidebar items may differ based on your assigned role and permissions.
-

4. Business Verticals

Business Verticals represent organizational divisions such as Dairy, Transport, or Maintenance. All your work (forms, submissions, sites, reports) is scoped to the vertical you are currently working in.

Switching Verticals

1. Look for the **Business Selector** dropdown at the top of the sidebar or header.
2. Select the vertical you want to work in.
3. The page will reload with data relevant to that vertical.

Business-Specific Pages

Once you select a vertical, you can access:

- **Sites** (/business/[code]/sites) - Locations belonging to this vertical.
 - **Forms** (/business/[code]/forms) - Forms available in this vertical.
 - **Submissions** (/business/[code]/submissions) - Your form submissions.
 - **Roles** (/business/[code]/roles) - Roles defined for this vertical.
-

5. Forms

5.1 Filling Out a Form

1. Navigate to **Business > [Your Vertical] > Forms**.
2. Select the form you want to fill out.
3. You will see the form rendered with steps (if multi-step) or all fields at once.

Step-by-step forms:

- Fill in the fields on the current step.
- Click **Next** to proceed to the next step.

- Click **Previous** to go back.
- A progress bar at the top shows your position.

Saving your work:

- Click **Save Draft** at any time to save your progress without submitting.
- You can return later and continue from where you left off.

Submitting:

- Once all required fields are completed, click **Submit**.
- Your submission enters the workflow and moves to its initial state.

5.2 Field Types You May Encounter

Field Type	Description
Text	Single-line text input
Textarea	Multi-line text input
Number	Numeric input with optional min/max
Email	Email address (validated format)
Phone	Phone number
Date / DateTime / Time	Date and time pickers
Dropdown / Select	Choose from a list of options
Radio	Select one option from a group
Checkbox	Select multiple options
File Upload	Upload documents or images (check allowed types and size limits)
Signature	Digital signature capture
Location	GPS or map-based location input

5.3 Creating a Form (Admin)

1. Go to **Admin > Forms** (/admin/forms).
2. Click **Create New Form**.
3. Fill in the form details:
 - **Form Code** - A unique identifier (e.g., daily_report).
 - **Title** - Display name of the form.
 - **Description** - Brief explanation of the form's purpose.
 - **Module** - The data module this form belongs to.
 - **Accessible Verticals** - Which business verticals can use this form.
4. Add **Steps** (for multi-step forms) or configure fields directly.
5. For each field, configure:

- Label, placeholder, and hint text.
 - Whether the field is required.
 - Validation rules (min/max length, pattern, etc.).
 - Default values.
 - Conditional visibility (show/hide based on other field values).
 - API-driven options (for dynamic dropdowns).
6. Optionally attach a **Workflow** for approval routing.
 7. Configure **UI Settings** (progress bar, draft saving, etc.).
 8. Click **Save**. The form is created at version 1.0.0.

5.4 Editing a Form (Admin)

1. Go to **Admin > Forms**.
2. Click on the form you want to edit.
3. Modify fields, steps, or settings as needed.
4. Click **Save**. The version number auto-increments.

5.5 Previewing a Form (Admin)

1. Go to **Admin > Forms > [Form Code]**.
 2. Click **Preview** to open the form in preview mode.
 3. Test field behavior, validation, and step navigation without creating a real submission.
-

6. Submissions

6.1 Viewing Your Submissions

1. Navigate to **Business > [Your Vertical] > Submissions** (/business/[code]/submissions).
2. You will see a list of all your submissions with:
 - Form name
 - Current status (Draft, Submitted, Approved, Rejected)
 - Submission date
 - Last updated

Filtering:

- Use the **Status** filter tabs to show only Draft, Submitted, Approved, or Rejected submissions.
- Use the **Search** bar to find specific submissions.
- Filter by **Form** to see submissions for a particular form.

Status summary cards at the top show counts for each status.

6.2 Viewing Submission Details

1. Click on any submission in the list.
2. The detail page shows:
 - All submitted field values.
 - Current workflow state.
 - Workflow history (who did what and when).
 - Comments from reviewers.

6.3 Workflow Actions on Submissions

Depending on your role and the current state, you may see action buttons:

Action	Description
Submit	Move a draft to the submitted state
Approve	Approve the submission (moves to approved state)
Reject	Reject the submission with a reason
Recall	Pull back a submitted form for editing

To approve or reject:

1. Open the submission detail page.
2. Review all field values.
3. Click **Approve** or **Reject**.
4. If rejecting, you must provide a comment explaining the reason.
5. The submitter is notified of the decision.

6.4 Adding Comments

1. On the submission detail page, scroll to the **Comments** section.
2. Type your comment in the text box.
3. Click **Add Comment**.
4. Comments are visible to all users who have access to this submission.

6.5 Workflow History

The **Workflow History** section on the submission detail page shows a timeline of:

- Every state transition (e.g., Draft -> Submitted -> Approved).
 - Who performed the action.
 - When it happened.
 - Any comments left during the transition.
-

7. Workflows

Workflows define the lifecycle of form submissions - the states they can be in and how they move between states.

7.1 Understanding Workflows

A workflow consists of:

- **States** - The possible statuses (e.g., Draft, Submitted, Under Review, Approved, Rejected).
- **Transitions** - The allowed movements between states (e.g., Draft -> Submitted).
- **Conditions** - Rules that must be met for a transition to occur.
- **Notifications** - Automatic alerts sent when transitions happen.

7.2 Creating a Workflow (Admin)

1. Go to **Admin > Workflows** (/admin/workflows).
2. Click **Create New Workflow**.
3. Enter:
 - **Code** - Unique identifier (e.g., standard_approval).
 - **Name** - Display name.
 - **Initial State** - The starting state (typically draft).
4. Switch to the **States** tab:
 - Add each state with a name and description.
 - Mark states as **Final** if they represent an end point (e.g., Approved, Rejected).
5. Switch to the **Transitions** tab:
 - Define which state transitions are allowed.
 - Set the action name (e.g., submit, approve, reject).
 - Optionally require a **comment** for the transition.
 - Optionally require a **permission** (e.g., project:approve).
6. Switch to the **Notifications** tab to configure automatic notifications.
7. Click **Save Workflow**.

7.3 Workflow Diagram

The workflow designer includes a **visual diagram** that shows:

- All states as nodes.
- Transitions as arrows between nodes.
- The current state highlighted.

Use this to verify your workflow logic before saving.

8. Document Management

8.1 Browsing Documents

1. Go to **Admin > Documents**.
2. The left sidebar shows **Categories** - click a category to filter documents.
3. Use the **Search** bar to find documents by name, tag, or content.

8.2 Uploading Documents

1. Click **Upload** or drag and drop files onto the upload area.
2. Select a **Category** for the document.
3. Add **Tags** to make the document easier to find.
4. Click **Upload** to confirm.

8.3 Viewing & Downloading

- Click on any document to open it in the **Document Viewer**.
- Click the **Download** button to save a local copy.
- Use **Bulk Download** to download multiple documents at once (select them first with checkboxes).

8.4 Version History

- Each document maintains a version history.
- When you upload a new version, the previous version is preserved.
- Click **Version History** on a document to see all versions and who made changes.

8.5 Managing Categories

1. In the Documents section, look for the **Manage Categories** option.
2. Create new categories, edit existing ones, or delete empty categories.
3. Categories help organize documents by type, department, or project.

8.6 Permissions

- Documents can have access controls.
 - Your admin can restrict who can view, edit, or delete specific documents.
 - If you cannot see a document, you may not have permission - contact your admin.
-

9. Projects & Tasks

9.1 Viewing Projects

1. Go to **Admin > Projects**.

2. You will see project cards showing:
 - Project name and code.
 - Business vertical.
 - Current status (Draft, Active, On-Hold, Completed, Cancelled).
 - Timeline (start and end dates).

Filtering:

- Filter by **Business Vertical**.
- Filter by **Status**.
- Search by project name, code, or description.

9.2 Creating a Project

1. Click **Create Project**.
2. Fill in:
 - **Name** - Project display name.
 - **Code** - Unique project identifier.
 - **Description** - What the project is about.
 - **Business Vertical** - Which vertical this project belongs to.
 - **Start Date** and **End Date**.
 - **Status** - Initial status (usually Draft).
3. Click **Save**.

9.3 Managing Tasks

1. Open a project by clicking on it.
2. Click **Create Task** to add a new task.
3. For each task, set:
 - Task title and description.
 - Assigned team member.
 - Task status.
 - Due date.
4. Track task progress from the project detail page.

10. Reports & Analytics

10.1 Domain-Specific Reports

The application includes specialized reports for different operational areas:

Report Type	Path	Description
Diesel	/reports/diesel/	Fuel consumption and efficiency

Report Type	Path	Description
Stock	/reports/stock/	Inventory levels and movement
Material	/reports/material/	Material usage tracking
Contractor	/reports/contractor/	Contractor performance
Dairy Site	/reports/dairysite/	Dairy operations reporting
DPR Site	/reports/dprsite/	Daily Progress Reports
Water	/reports/water/	Water management
Payment	/reports/payment/	Payment tracking
Vehicle Log	/reports/vehiclelog/	Vehicle activity logs
MNR	/reports/mnr/	MNR reporting
E-Way	/reports/eway/	E-Way bill reports
Tasks	/reports/tasks/	Task progress reports
Painting	/reports/painting/	Painting work tracking
Wrapping	/reports/wrapping/	Wrapping activity reports

For each report type:

1. Navigate to the report section.
2. View the list of existing reports.
3. Click **Create** to add a new report entry.
4. Click on an existing report to view or edit it.
5. Use **Search** and **Filters** to find specific reports.

10.2 Custom Report Builder

1. Go to **Admin > Analytics > Reports > Builder**
(/admin/analytics/reports/builder).
2. **Select Data Source** - Choose the form/table to report on.
3. **Choose Fields** - Pick which columns to include.
4. **Add Filters** - Set conditions to narrow the data.
5. **Configure Display:**
 - **Table** - Data in rows and columns.
 - **Bar Chart** - Vertical bar visualization.
 - **Line Chart** - Trend lines over time.
 - **Pie Chart** - Proportional breakdown.
6. Click **Preview** to see the report live.
7. Click **Save** to store the report for future use.
8. Click **Execute** to generate the report with current data.

10.3 Dashboards

1. Go to **Admin > Analytics > Dashboards**.
 2. Create a new dashboard or select an existing one.
 3. Dashboards combine multiple charts and metrics on a single page.
 4. Use the Dashboard Builder to arrange widgets and configure data sources.
-

11. User Management

11.1 Viewing Users

1. Go to **Admin > Users** (/admin/users).
2. Browse the list of all users.
3. Use **Search** to find users by name, email, or phone.
4. Filter by **Role** or **Business Vertical**.

11.2 Creating a User

1. Click **Create User**.
2. Fill in:
 - **Name** - Full name.
 - **Email** - Login email address.
 - **Phone** - Contact number.
 - **Password** - Set a strong password (password strength indicator is provided).
 - **Global Role** - Assign a system-wide role.
 - **Business Vertical** - Assign to a vertical.
 - **Status** - Active or Inactive.
3. Click **Save**.

11.3 Managing a User

Click on any user to open their detail view. From here you can:

- **Edit Details** - Update name, email, phone, or password.
 - **Change Role** - Reassign their global or business-specific role.
 - **Manage Attributes** - Set resource attributes (e.g., department, location).
 - **Manage Sites** - Control which sites the user can access.
 - **Activate/Deactivate** - Toggle user access.
-

12. Roles & Permissions (RBAC)

12.1 Understanding Roles

Roles control what users can see and do. There are two types:

- **Global Roles** - Apply system-wide (e.g., Super Admin, System Admin).
- **Business Roles** - Apply within a specific business vertical (e.g., Site Manager, Approver).

12.2 Managing Roles

1. Go to **Admin > Roles & Permissions > Roles** (/admin/rbac/roles).
2. View all existing roles.
3. Click **Create Role** to define a new role:
 - **Name** and **Display Name**.
 - **Level** - Hierarchy position.
 - **Scope** - Global or Business-specific.
 - **Description** - What this role is for.
4. Assign **Permissions** to the role.

12.3 Managing Permissions

1. Go to **Admin > Roles & Permissions > Permissions** (/admin/rbac/permissions).
2. Permissions are grouped by **Resource** (Forms, Documents, Reports, Projects, etc.).
3. Each permission has an **Action** (Create, Read, Update, Delete, Approve, etc.).
4. Assign permissions to roles to control access.

Common permission examples:

- forms:create - Can create new forms.
 - submissions:approve - Can approve form submissions.
 - documents:delete - Can delete documents.
 - users:manage - Can manage other users.
-

13. Attribute-Based Access Control (ABAC)

ABAC provides fine-grained access control beyond roles, using attributes and policies.

13.1 Attributes

1. Go to **Admin > Attributes** (/admin/attributes).
2. Attributes define properties of users, resources, or the environment.
3. Supported data types: String, Number, Boolean, Date, JSON.
4. Create attributes with categories and validation rules.

13.2 ABAC Policies

1. Go to **Admin > ABAC Policies** (/admin/policies).
2. Policies define access rules using conditions on attributes.

Creating a Policy:

1. Click **Create Policy**.
 2. Set:
 - **Name** - Policy identifier.
 - **Effect** - ALLOW or DENY.
 - **Priority** - Evaluation order (higher priority evaluated first).
 - **Status** - Active, Inactive, Draft, or Archived.
 3. Build **Conditions** - Define when this policy applies using attribute comparisons.
 4. Set **Resource Targeting** - Which resources this policy covers.
 5. Use **Test Policy** to validate with sample data before activating.
-

14. Sites Management

Sites represent physical locations (offices, factories, project sites, etc.).

14.1 Managing Sites

1. Go to **Admin > Masters > Sites** or **Business > [Vertical] > Sites**.
2. View all sites with their details and status.

14.2 Creating a Site

1. Click **Create Site**.
2. Fill in:
 - **Name** and **Code**.
 - **Location** information.
 - **Business Vertical** assignment.
 - **Status** (Active/Inactive).
3. Click **Save**.

14.3 Editing a Site

1. Click on a site in the list, or click the **Edit** button.
2. Update details as needed.
3. Click **Save**.

14.4 Site Access Control

- Admins can control which users have access to which sites.
- This is managed through **User Management > Manage Sites**.

- Users will only see data for sites they have been granted access to.
-

15. Notifications

15.1 Viewing Notifications

1. Click the **Notification Bell** icon in the header.
2. A dropdown shows your recent notifications.
3. Click on a notification to navigate to the related item.

15.2 Notification Types

Type	When It Triggers
Workflow Transition	A submission you're involved with changes state
Approval Required	A submission needs your approval
Approved/Rejected	Your submission was approved or rejected
Task Assignment	A task has been assigned to you
Document Update	A document you follow has been updated
Mention	Someone mentioned you in a comment

15.3 Priority Levels

- **Critical** - Requires immediate attention.
- **High** - Important, review soon.
- **Normal** - Standard notifications.
- **Low** - Informational.

15.4 Managing Notifications

- **Mark as Read** - Click a notification or use "Mark All as Read".
- **Delete** - Remove notifications you no longer need.
- **Filter** - Filter by type, priority, or read/unread status.

15.5 Notification Preferences (Admin)

1. Go to **Admin > Notifications**.
 2. Configure which notifications are sent and through which channels (Email, SMS, In-app).
 3. Set up notification rules for workflow transitions.
-

16. Chat & Messaging

16.1 Accessing Chat

1. Go to **Admin > Chats** (/admin/chats).
2. View your group conversations.

16.2 Group Conversations

- **Create a Group** - Click “Create Group”, set a title, description, and add members.
- **Send Messages** - Type in the message box and press Enter or click Send.
- **View History** - Scroll up to see previous messages.
- **Manage Members** - Add or remove members from the group.

16.3 Chat Notifications

You will receive notifications when:

- A new message is posted in a group you belong to.
 - You are added to a new group.
-

17. Geofence & Maps

17.1 Map View

The application includes interactive maps for:

- Viewing **site locations** on a map.
- Seeing **project locations** and progress.
- Visualizing **geofence boundaries** - geographical areas defined for operations.

17.2 Using Maps

- **Zoom** - Use scroll wheel or pinch gesture.
 - **Pan** - Click and drag to move around.
 - **Markers** - Click on map markers to see site/project details.
 - **Geofence Areas** - Colored regions on the map show defined geofence boundaries.
-

18. Frequently Asked Questions

Q: I forgot my password. How do I reset it?

Contact your system administrator. They can reset your password from the User Management section.

Q: I can't see a form that I need to fill out.

This is likely a permissions issue. The form may not be assigned to your business vertical, or you may not have the required role. Contact your admin.

Q: My form submission is stuck in "Submitted" state.

A reviewer or approver needs to take action. Check the submission's Workflow History to see who is responsible for the next step. You can also contact them directly or check if notifications have been sent.

Q: I accidentally submitted a form with wrong data.

If the workflow allows it, use the **Recall** action on the submission detail page to pull it back for editing. If Recall is not available, contact the reviewer to reject it so you can resubmit.

Q: I can't upload a file - it says "file type not allowed."

The form administrator has set restrictions on allowed file types (e.g., PDF, JPG, PNG). Make sure your file matches the allowed types and does not exceed the maximum file size.

Q: How do I switch between business verticals?

Use the **Business Selector** dropdown in the sidebar or header area. Select the vertical you want to work in.

Q: I see "Permission Denied" when trying to access a page.

Your current role does not have access to that feature. Contact your admin to request the necessary permissions.

Q: Can I export submission data?

Yes, use the **Reports & Analytics** section to build custom reports from submission data and export them.

Q: How do I see who approved or rejected my submission?

Open the submission detail page and look at the **Workflow History** section. It shows every state change, who made it, and when.

19. Troubleshooting

Page Not Loading

- Check your internet connection.
- Try refreshing the page (Ctrl+R or Cmd+R).

- Clear your browser cache and try again.
- Try a different browser (Chrome, Firefox, or Edge recommended).

Login Issues

- Verify you are using the correct email and password.
- Check if your account is active (contact your admin).
- Clear browser cookies and try again.

Form Not Saving

- Ensure all required fields (marked with *) are filled in.
- Check for validation errors highlighted in red.
- Ensure your internet connection is stable.
- Try clicking **Save Draft** before submitting.

File Upload Failures

- Verify the file is within the allowed size limit.
- Check that the file type is allowed (e.g., PDF, JPG, PNG, DOCX).
- Try a smaller file or a different format.

Missing Data or Features

- You may not have the required role or permissions.
- The feature may not be configured for your business vertical.
- Contact your system administrator for access.

Notification Issues

- Check your notification preferences are correctly configured.
- Ensure your email address is correct in your profile.
- Check your email spam/junk folder for email notifications.

Need further help? Contact your system administrator or IT support team for assistance with issues not covered in this guide.
